

# EVAN SITT

## Computer Science Student

@ Sitt.Evan@gmail.com    +1 312 270 0648    1011 E Kevin Circle, Palatine, IL 60074 United States  
📍 Budapest, Hungary    in linkedin.com/in/evan-sitt/    github.com/ParadoxChains

## EXPERIENCE

### Instructor (Functional Programming)

#### Eötvös Loránd University

📅 September 2019 – Ongoing    📍 Budapest, Hungary

- Introduce incoming first year students to the functional programming paradigm, from good coding habits to basic algorithms, by using practical coding methodology.
- Organize and manage curriculum and consultations to promote better student progression and performance.
- Recruited and organized a team of 12 undergraduate students in furthering their pursuit of functional programming with development of an digital signal processing framework.

### Student Developer

#### Ericsson Hungary

📅 March 2019 – December 2019    📍 Budapest, Hungary

- Have proper knowledge and skill in coding with Erlang for telecommunication applications.
- Write functional tests for new functionality developed by the team.
- Address customer raised Trouble Reports and Issues in a timely manner via debugging and testing.
- Extend and refactor legacy code for better performance, efficiency, and maintainability.

## PROJECTS

### Digital Signal Processing Plugin for Multilayered Synthesis

#### Eötvös Loránd University

📅 2019-2020 Academic Year

This project will implement a DSP plugin, using the Virtual Studio Technology 3 (VST3) interface standard. The project will handle MIDI input and generate a polyphonic multilayered synthesizer waveform via the use of wavetables, combining both additive and subtractive synthesis. The implementation of the project will be accomplished with the use of the JUCE framework. The application will be hosted by any VST3 compatible DAW, or used as a standalone synthesizer application.

### Implementation of Digital Synthesis in Functional Programming

#### Eötvös Loránd University

📅 2019-2020 Academic Year

Digital synthesis is a cross discipline application used in fields such as music, telecommunication, and others. The nature of digital synthesis involving multiple tracks as well as parallel post-processes lends itself naturally to the functional programming paradigm. The paper demonstrates this by creating a fully functional, cross platform, standalone synthesizer application framework implemented in a pure lazy functional language. The application handles MIDI input and produces wav output played by any multimedia player. Therefore, it can serve as a preprocessor for users who intend to create digital signals before transcribing them into a digital or physical media.

## MY LIFE PHILOSOPHY

*“Proactive Versatility.”*

## STRENGTHS

- Good Leader, Better Follower
- Diverse Skillset    Passionate
- Meticulous    Resourceful

## SKILLS

- C++    JAVA    Erlang    JUCE
- Concurrent Clean    LaTeX    Python
- SQL    HTML/CSS    Adobe Photoshop
- Adobe After Effects    FL Studio

## LANGUAGES

- English    ●●●●●
- Cantonese Chinese    ●●●●●
- Spanish    ●●●●●
- Magyar    ●●●●●

## EDUCATION

### B.Sc. in Computer Science

#### Eötvös Loránd University

📅 Sept 2017 – June 2020

Thesis title: Digital Signal Processing Plugin for Multilayered Synthesis

## CITIZENSHIP

- United States of America
- Natural Born Citizen
